DEPARTMENT OF NATURAL RESOURCES

LANSING

REBECCA A. HUMPHRIES  
DIRECTOR

September 17, 2007  
Resubmitted: October 15, 2007

TO: Rebecca A. Humphries, Director

INFORMATION: Natural Resources Commission

SUBJECT: Special Hook Size Fishing Regulations (FO-202)

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game, and birds.

Discussion and Background:

Townsend Creek supplies cold water to the Lake Chapin impoundment just upstream of Berrien Springs Dam. The influence of the dam creates a drowned creek mouth that is shallow where brown trout, steelhead, and salmon are easily observed and fished. Conservation officers have indicated that a large percentage of fish are foul-hooked as a result of the conditions there. Law Enforcement Division and Fisheries Division believe that implementation of more restrictive gear type regulations will reduce the incidence of foul-hooked fish. This same regulation has been successful in curbing illegal activity and reducing the incidence of foul-hooked fish in other locations such as: Swan Creek, Platte River, Boyne River, Bear River, and Sable River.
